

Thank you for purchasing Fenpral Intestinal Wormer for your dogs.

Fenpral Allwormer for Dogs is a veterinary dog wormer, registered by Riverside Veterinary Products Ltd and manufactured in Australia under strict quality controls. It has been successfully used by dog owners in that country for approximately ten years. In a joint venture project between, Riverside Veterinary in Australia, Robyn Bates Pharmaceuticals Ltd and LD & JP Wallace Ltd in New Zealand; Fenpral was registered and licensed in NZ in July 2015 and was made available for dog owners in 2016. Fenpral is distributed throughout New Zealand direct to dog owners by Les and Janine Wallace.

Australian Veterinarian Dr Robert May is a Principal Director of Riverside Veterinary, and is a recognised authority on all aspects of Veterinary canine health. *"Fenpral has been administered by dog owners throughout Australia with excellent results and without any adverse reactions."* Dr Robert May BVSc Riverside Veterinary.

Les and Janine Wallace have been working in partnership with Robyn and John Bates and Riverside Veterinary for several years handling the distribution for their equine drenches throughout New Zealand and now their dog wormer Fenpral. Veterinarian and Director of Riverside Veterinary, Dr Robert May, consults regularly with the New Zealand team, and this combination of veterinary knowledge, a quality veterinary product distributed throughout NZ at the best price, is providing an excellent service for horse and dog owners throughout New Zealand.

STORAGE: Store below 25° (Air Conditioning)

FENPRAL

INTESTINAL WORMER FOR DOGS

Caution

KEEP OUT OF REACH OF CHILDREN

For Animal Treatment Only

DIRECTIONS FOR USE:

Administer as a single dose by mouth.

Dose: Weigh dog to determine dosage, giving one (1) tablet per 10kg bodyweight, rounding up to the nearest ¼ tablet.

Treatment is best given after a meal in the morning.

Treatment regimen:

Hydatid tapeworm: Dogs should not be fed, or allowed to feed on, offal from any species. Dogs in hydatid areas should be treated every 6 weeks.

Other tapeworm: Treat every 3 months
Flea tapeworm: Control of fleas in your dog by appropriate treatment limits infestation by *Dipylidium* spp. Tapeworms as fleas are vectors for these parasites

Roundworm and Hookworm: Treat at 2,4,8 and 12 weeks – thereafter every 3 months.

Whipworm: Treat every 6 to 8 weeks after 3 months of age

Pregnant bitches: Treat at mating, before whelping and then every 3 months
 If worm problems persist, consult a veterinarian.

BATCH No: 5106 EXPIRY: 09/2017
